

FREQUENTIS & eyeson

Redefining Visual Situation Awareness & Communications for Public Safety Teams

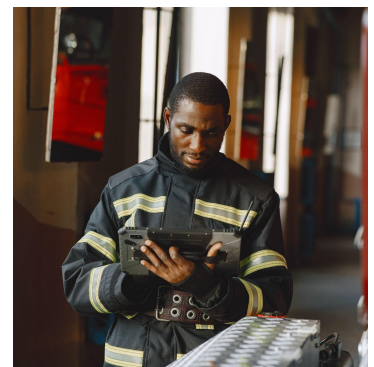

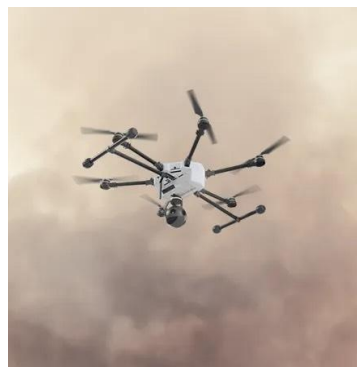

Eyeson and Frequentis partner to deliver interactive real-time visual collaboration capabilities, seamlessly integrated with Frequentis MissionX to supercharge Mission Critical Services (MCX).

Holistic Situation Awareness for Fast & Efficient Responses

Frequentis is a global leader in designing and manufacturing mission-critical communication and control systems tailored for emergency services and public safety organizations. Built to meet stringent reliability and security standards, Frequentis' solutions ensure uninterrupted operations during crisis situations, utilizing the latest communication technologies adapted for the public safety market.

Integrating Eyeson's One View technology with Frequentis' MissionX platform allows public safety teams to gain reactivity and accelerate life-saving decision cycles.

The innovative concept of Eyeson Virtual Situation Rooms enables dispatchers and stakeholders to collaborate live with remote teams around real-time video feeds (drones, CCTVs), maps, and metadata. The solution integrates resilient communication capabilities and AI options to filter and prioritize real time information.

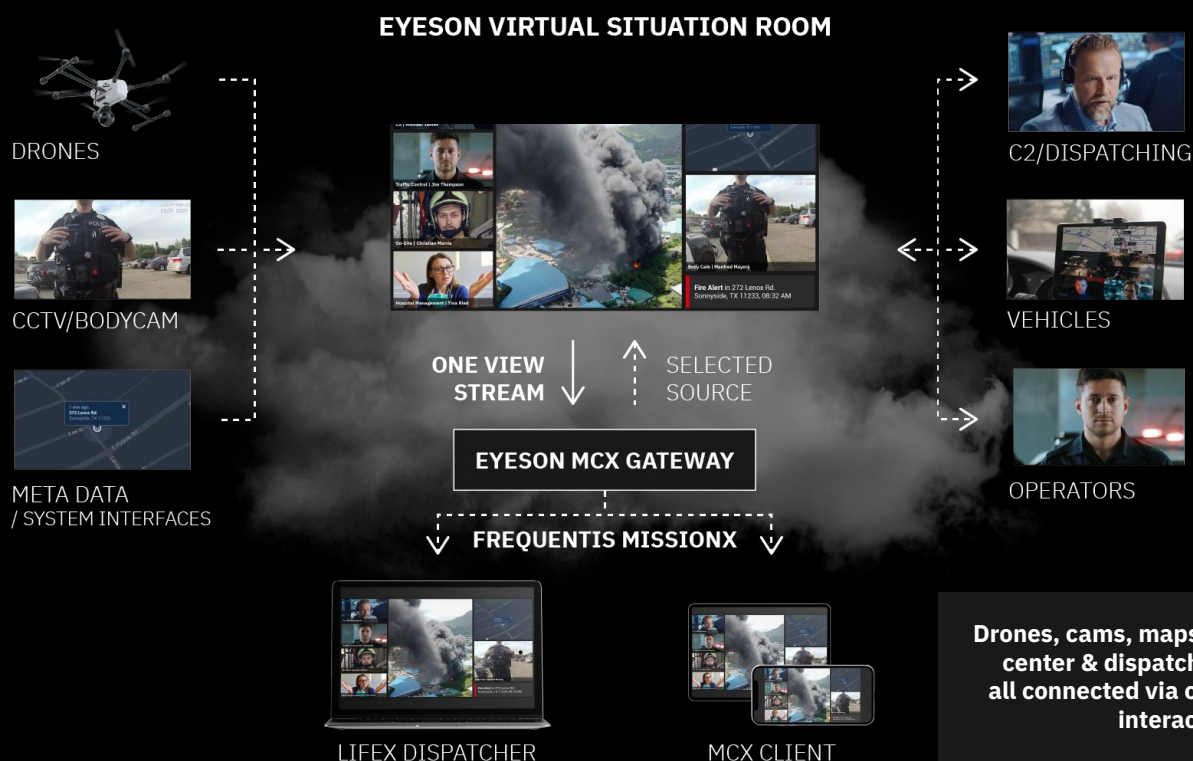

FOR A NEW LEVEL OF COMMUNICATION WITH DISPATCHED TEAMS

Total Visual Situation Awareness & Real-time Teaming on Mobile Devices

With Frequentis MissionX, public safety teams can easily use the latest technologies to help save lives. MissionX, an integrated end-to-end solution based on Mission Critical Services (MCS/MCX) as defined by 3GPP, is at the forefront of this transformation, ensuring reliable safety-critical multimedia communication across various network types. MissionX, integrating Eyeson One View, represents the next generation of emergency communications, enabling:

- Seamless transmission of interactive voice, video, data across public & private networks
- Total situational awareness via integration of drones, cameras, systems screens, maps
- Resilient communication capabilities over challenged networks
- Prioritized communications for emergency services
- Simple and secured access from any smartphone, tablet or computer
- End-to-end encryption and advanced security features
- 99.999% availability even during peak demand

With Eyeson's integrated technology, MissionX enables cohesive communication with dispatched teams.
